Press Release

Introducing the ATIEL & UEIL Product Carbon Footprint (PCF) Tool

12th December 2024

The ATIEL & UEIL Joint Sustainability Committee has launched the **PCF Calculation Tool**, a easy to use Excel-based calculator designed to harmonize and streamline the calculation of PCF for lubricants. This tool adheres to the **third-party certified Methodology for Product Carbon Footprint Calculations for Lubricants, Greases, and Other Specialties**. It empowers lubricant manufacturers and stakeholders with a user-friendly interface for calculating PCFs.

Key features include:

- **How-to-Use Guidance:** Detailed instructions for a seamless experience.
- **Input Tabs:** Capture raw material and manufacturing emissions.
- **Output Tab:** Generate transparent PCF results.

The tool was developed to address the growing need for **harmonization and transparency** in PCF calculations within the industry, enabling:

- **Transparency:** Allows users to apply the third-party certified methodology.
- **Consistency:** Enables that PCF calculations can meet regulatory requirements, are compatible with other industry standards and can support consistent management for reducing carbon footprint.
- **Market Advantage:** Enhance market position by demonstrating commitment to sustainability

Available to all lubricant industry stakeholders worldwide, this tool represents a significant step toward achieving alignment and transparency in PCF reporting.
