

Press Release

ATIEL and UEIL cooperates to develop a methodology to calculate and report Product Carbon Footprints (PCFs) for Lubricants and Greases.

1st February 2023

UEIL and ATIEL are pleased to announce a collaboration to develop a methodology to calculate and report Product Carbon Footprints (PCFs) for Lubricants and Greases. Beginning in January 2023, a working group has come together under the guidance of a consultant to develop a harmonized cradle-to-gate (blenders / marketers exit gate) PCF methodology.

The aim of the PCF WG is to develop a common standard that can be used by the whole lubricants industry, ensuring consistency and transparency throughout the entire supply chain.

It is anticipated that the PCF methodology for the Lubricants and Grease industry will be published in the second half of 2023.

Mattia Adani, UEIL President highlighted that *“To be able to determine Product Carbon Footprints for Lubricants on a common, harmonized basis for the whole European Lubricants Industry is a decisive capability that we want to develop jointly with ATIEL.”*

Marco Digioia, ATIEL President stated that *“This joint PCF harmonization effort is of paramount importance in bringing a consistent approach to assess the environmental impacts of our products in line with the objectives of the European Green Deal and globally”.*
