SAIT Webinar

14 April 2025

Mike Boyer, Director | SAIL

- Importance of Quality standards and the ACEA European Oil Sequences
- The European Engine Lubricants Quality Management System (EELQMS)
- Role of SAIL - Monitoring quality in the market

Importance of Quality standards and the ACEA European Oil Sequences

Importance of quality standards

- OEMs need to know that appropriate quality engine lubricants will be available in all their markets.
- Trade/workshops need assurance that inadequate lubricant performance will not lead to warranty claims.
- Consumers need confidence in quality of the products being used in their vehicles.

Quality and performance claims

- Although, typically, an engine lubricant will carry a number of industry and OEM claims, today we will focus on ACEA sequence performance claims
- An ACEA claim represents the minimum level of performance required to provide basic protection. It is often quoted in vehicle handbooks as an alternative if an OEM approved lubricant is not available and is a prerequisite for many OEM engine oil specifications

About ACEA

- ACEA (European Automobile Manufacturers Association) represents the interests of major European car, truck and bus manufacturers.
- Sets performance specifications for engine lubricants through its European Oil Sequences.
- ACEA performance specifications increasingly adopted outside Europe.

ACEA Oil Sequences

- ACEA European Oil Sequences cover light-duty passenger cars & heavy-duty trucks.
- The ACEA Oil Sequences are updated regularly to address:
 - Changes in European legislation
 - Changes in engine technology
 - Changes in fuel composition
- The current issues of the Oil Sequences are ACEA 2024 for Heavy-duty engines and ACEA 2023 for Light-duty engines.

Validity of ACEA Oil Sequences

Light-duty

Sequence issue	First allowable use	Mandatory for new formulation claims	Oils with this claim may be marketed until
2004	1 st Nov 2004	1 st Nov 2005	31 st Dec 2009
2007	1 st Feb 2007	1 st Feb 2008	23 rd Dec 2010

The European Engine Lubricants Quality Management System (EELQMS)

About EELQMS (European Engine Lubricant Quality Management System)

- EELQMS addresses product development testing and product performance documentation, involves the registration of all candidate and reference oil testing, and defines the compliance process.
- Compliance with the Code of Practice of the Technical Association of the European Lubricants Industry (ATIEL), which forms part of the EELQMS, is **mandatory** for any claim to meet the requirements of this issue of the ACEA sequences.
- Therefore, ACEA requires that claims against the ACEA Oil Sequences can only be made by oil companies who have signed the EELQMS oil marketers' letter of conformance

Source: ACEA Oil Sequences General requirements September 2023

About EELQMS stakeholders and inputs

About the EELQMS

- Quality management system for automotive engine lubricants.
- Only for claims made against the ACEA engine oil sequences. Some OEM approvals may also require participation.
- If you choose to participate then the system rules are mandatory, for example the Codes of Practice. You can't pick and choose.
- Developed by industry stakeholders to promote development of improved, fit-for-purpose engine lubricants that meet increasing technical requirements.
- Designed to assist lubricant marketers in assuring the quality of their lubricants and the performance claims being made for them in the marketplace for the benefit of end users.

Quality and performance claims

- How do you know that your products meet the ACEA requirements?
- As a lubricant marketer you are responsible for all aspects of product liability!
- Typically, technology providers can provide candidate data packages that demonstrate how their technology and the approved formulations that they promote meet the constituent parts of the requirements of EELQMS

About candidate data packages

Company Document Ref. No.						

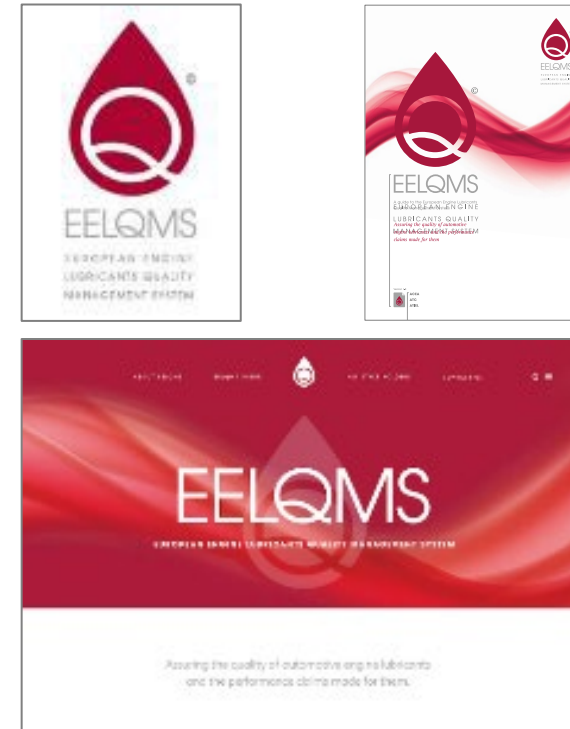

EELQMS contribution to quality

- Detailed process and structure for lubricant development, production and performance validation.
- Provides assurance of the quality of engine lubricants on the market that claim to meet the performance requirements of ACEA.
- The ONLY system that can be used to qualify engine lubricants against ACEA Oil Sequences.
- Administered by ATIEL on behalf of the other key stakeholders.

Promoting EELQMS

- New identity with logo and branding.
- New separate document clearly setting out the guidelines for compliance with EELQMS.
- New dedicated website:
www.eelqms.eu
- Logo can be used in marketing material under license, but only by signatories of EELQMS.

Summary of EELQMS guidelines

- Lubricant marketers developing engine lubricants in compliance with ACEA Oil Sequences shall carry out formulation development, blending and marketing in accordance with the guidelines in the ATIEL Code of Practice and ATC Code of Practice:
 - incorporating EELQMS guidelines in a quality management system (e.g. ISO 9001, or IATF 16949).
 - ensuring an independent audit of the lubricant development process.
 - requires Code of Practice checklists signed off by an authorised company representative.
 - blending products according to requirements of ATIEL Code of Practice, including accreditation to an auditable QMS.
 - signing a Marketers' Letter of Conformance and registering it with ATIEL.

Template for the EELQMS Lubricant marketers' Letter of Conformance

(Letter to be addressed to ATIEL) and sent by registered mail to:

ATIEL
Rue de la Soudan 105
1150 Brussels
Belgium

From: [Company name]

[Insert correct address]

[Insert e-mail address for correspondence]

Date: [Insert current date]

Subject: Participation in the ATIEL European Engine Lubricants Quality Management System: Letter of Conformance

(Name of the participating company, hereinafter referred to as "The Company", duly represented by the undersigned adding for "The Company" and stating acting under its brand, hereby formally declares to participate in the European Engine Lubricants Quality Management System (EELQMS).

The commitments referred to in this letter apply to all product brands owned or managed by The Company that make ACEA claims.

[Please let the brand name(s) *]

* The letter shall include, but the parties shall remain free to add, the Company's full name, address, telephone and fax numbers and e-mail address.
It shall also contain the name(s) of the person(s) for brands that are owned or managed by multiple independent marketers and/or other use cases brands in the list.

ATIEL Code of Practice
3.0.1 Rev. 2016

Issue 20: 2016

Role of SAIL – Monitoring quality in the market

Who are SAIL?

- Subsidiary of ATIEL - The Technical Association of the European Lubricants Industry
- Contracted by ATIEL to provide administrative, financial and management services in support of ATIEL's global product compliance and Letter of Conformance activities on a non-profit making basis.
- Manages the registration system of Letter of Conformance signatories
- Responsible for managing ATIEL's product compliance monitoring programme.
- Licences the EELQMS quality trademark in association with ATC and ACEA.

Marketer's Letter of Conformance

Compliance with the EELQMS includes signing a Lubricant Marketers' Letter of Conformance:

- Required for ACEA performance claims
- Declaration of compliance with EELQMS by lubricant marketer
- Signed Letters held by SAIL of behalf of ATIEL (EELQMS administrator)
- List of signatories on SAIL website
- Renewed annually
- Membership of ATIEL not required to be a signatory
- Letter of Conformance template available from SAIL website: www.sail-europe.eu

Template for the EELQMS Lubricant marketers' Letter of Conformance

(to be addressed to ATIEL and sent by registered mail)

ATIEL
Rue de la Loi 165
1049 Brussels
Belgium

(Insert correct address)
(Insert e-mail address for correspondence)
Date: (Insert current date)

Subject: Participation in the ATIEL European Engine Lubricants Quality Management System: Letter of Conformance

(Name of the participating company, hereinafter referred to as "The Company", duly represented by the undersigned acting for The Company and entities acting under its brand, hereby formally declares to participate in the European Engine Lubricants Quality Management System (EELQMS).

The commitments referred to in this letter apply to all product brands owned or managed by The Company that make ACEA claims.

(Please let the undersigned "I")

* The letter should include list the product brand names (or mark) which the Company has commitments towards and not all product names.
It should also include the product brands that are owned or managed by the Company, but which do not make ACEA claims.

ATIEL Code of Practice
30 April 2016

Issue 20 2016

SAIL's Role in EELQMS

- SAIL operates the registration system of the signatories of the Letter of Conformance, and on behalf of ATIEL, in association with ATC and ACEA, licences the use of the EELQMS quality trademark.
- SAIL has been contracted by ATIEL to provide administrative, financial and management services in support of ATIEL's product compliance and Letter of Conformance activities on a non-profit making basis.
- SAIL is responsible for ATIEL's product compliance monitoring programme.
- SAIL ensure all survey reports and summaries are anonymised to avoid potential conflicts of interests between members and participants

Did you know ...?

... in 2024, ATIEL/SAIL sponsored over 4000 individual tests as part of the Lubricant Marketers' Letter of Conformance compliance program

... ACEA lubricants have a truly global reach with over four hundred participants in sixty - three countries across six continents

...ACEA is a full and active participant in the process

... Letter of Conformance scheme participants are licensed to use the EELQMS logo on their packaging demonstrating that their lubricant meets the minimum standards of leading European vehicle manufacturers

***17-Jan-22 SAIL: Report sent

***10-Mar-22 SAIL: Reminder sent

***29-Apr-22 SAIL: Reminder sent

***04-May-22 Marketer: Thank you for pointing out the compliance requirements.

Please note that product is yet to be in market and currently we do not have any product to be recalled from the market.

I have attached the updated label artwork to be used for the product as per the ATIEL compliance requirements.

Kindly let us know if this is good to go.

***04-May-22 SAIL: Many thanks for your email. Were you able to check with your technology provider that the formulation meets the requirements of ACEA C2 and C3? Would it be possible to ask them to confirm that these claims are correct? For ACEA C2, a fuel economy improvement of $\geq 2.5\%$ relative to a 15W-40 reference oil is required. It would normally be extremely difficult to achieve that level of fuel economy improvement with a 5W-40 grade lubricant.

***05-May-22 Marketer: I shall check with our additive supplier and revert.

Shall take the necessary corrective action accordingly.

Once again thank you for pointing out the requirements.

***25-May-22 Marketer: We have checked the requirements internally with our team and technology supplier as well. As you have rightly pointed out, the package meets the requirements of ACEA C3 only. We have taken the necessary corrective action to meet the ATIEL compliance requirements.

I have attached the corrected label artwork for your confirmation. Thank you again for pointing out the same.

Please advise if we need to take any further corrective action as well.

***25-May-22 SAIL: Many thanks for your email. The changes made to your label are duly noted and I will advise ATIEL QMS Technical Committee accordingly. They will advise if any further

A Very Bad Example

Analytical Parameter	Standard	Unit	Result	Repetition	Limit
Kinematic Viscosity at 100°C	D445	mm ² /s	9,971	9,962	12.5 - <16.3
CCS at -30°C	D5293	mPa•s	40199	39861	6600
MRV at -35°C	D4684	mPa•s	TVTM	TVTM	30,000
Yield Stress	D4684	Pa	< 350	< 350	No yield stress
